|----------------|---|---|
| ACCESSIBLE     | — | To access the hostel there is a series of levels one needs to walk down. In addition, right before arriving at the entrance of the building there are four stairs to take. No ramp available. To be noted, the slope's gradient makes it more difficult to have access. |

|----------------|-------------------------------------|--|
| ACCESSIBLE     | <input type="checkbox"/>            | At the main entrance door, there is one stair that would make the passage of a wheelchair impossible without the contribution of other people. |

|                |   |  |
|----------------|---|--|
| ACCESSIBLE     | ✗ | The only ramp available, giving access to the hallway and to the bedroom and bathroom is accessible. One guideline informing blind people or people with sight impairment that there is a ramp ahead is missing. |

| ACCESSIBLE     | — | There is not a lift. The lack of this possibility of vertical displacement prevents pilgrims with physical disabilities from accessing the washing and drying machines that are situated on the first floor. |

| ACCESSIBLE     |  | <p>All of the information on the walls and doors are too high to read for people in wheelchairs and the letters are tiny even for people standing.</p> <p>Overall, the hostel is not marked to facilitate the access and guide people with sight impairments, putting them in danger every time they come up with a stair (on the way to the kitchen) or a ramp.</p> |
